

Sump pump repair

Work Order #123456 • JSA #EA19-0001 DRAFT

Hazards & Controls

Add all relevant steps that may involve hazards and assess the risks for each hazard. Then implement controls to lower the residual risk level. Risk assessment is meant to be subjective.

The best design solution often comes from co-design session with stakeholders or a multi-disciplinary team. Here we were ideating interaction flows and user interfaces for a new community product. I planned and facilitated the workshop, and helped synthesize the ideas.

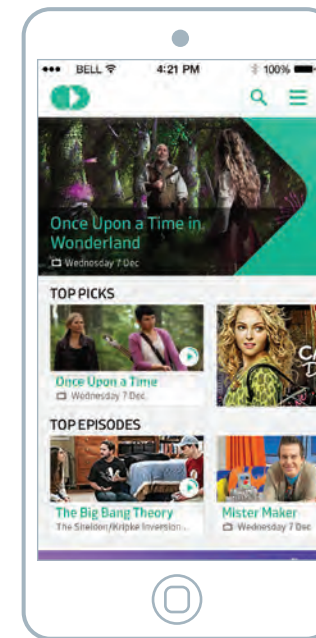

Recently I planned and ran a lean Information Architecture workshop, which included product managers, designers and developers from across the product platforms. The purpose was to construct a first-cut structure of our new hub content and navigation while aligning our vision.

PROJECT
Auckland Airport 2016

CLIENT
Auckland Airport

INFO
A full redesign and rebuild of the Auckland Airport digital experience for all its departments: travel, retail, parking, property and operations. *Art direction, lead interaction & visual design, IA, prototyping, team lead and presentation.*
